SEMESTER – VII

Subject: B	lockchain and Crypto currenc	у							
Cours	se Code: PECICB701A	Semester: VII							
]	Duration: 36 Hrs.	Maximum Marks: 10)0						
r.	Feaching Scheme	Examination Schem	e						
	Theory: 3	End Semester Exam: 70							
	Tutorial: 0	Attendance: 5							
	Practical: 0	Continuous Assessment	t: 25						
	Credit: 3	Professional Elective Co	ourse						
Aim:									
СО									
1.	Explain cryptographic build	ing blocks and reason about their security							
2.	Define Bitcoin's consensus r	nechanism							
3.	Learn how the individual co	mponents of the Bitcoin protocol make the	whole sys	tem					
	works: transactions, script, b	locks, and the peer-to-peer network	·						
4.	Define how mining can be re	e-designed in alternative cryptocurrencies							
5.	Understand the basics of cry	ptocurrencies and use Ethereum programm	ing.						
Objective:	_								
Sl. No.									
1.	To learn Blockchain systems	s: Nuts and Bolts							
2.	Able to analyse Decentralize	ed systems							
3.	To understand Tokenization	and ICOs							
4.	To describe Cryptography o	fBlockcham							
Pre-Requi	site:

SOCIAL NETWORK ANALYSIS:

Course Code				PEC	CICB701B			
Category				Professional	l Elective Cour	se		
Course title			SC	DCIAL NET	WORK ANAL	YSIS		
Scheme and Credits	L	T	Р	Cr. Points	Lec. Hrs.			
	3	0	0	3	36			
Pre-requisites/ Co- requisites (if any)	- Data Mining and Graph Theory							

OBJECTIVES:

- To understand the concept of semantic web and related applications.
- To learn knowledge representation using ontology.
- To understand human behaviour in social web and related communities.
- To learn visualization of social networks.

OUTCOMES:

Upon completion of the course, the students should be able to:

- CO1: Develop and Remember semantic web related applications.
- CO2: Represent and explain knowledge using ontology.
- CO3: Predict and Analyze human behaviour in social web and related communities.
- CO4: Understand and Visualize social networks.

UNIT I INTRODUCTION [7L]

Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks, Blogs and online communities - Web-based networks - Applications of Social Network Analysis.

UNIT II MODELLING, AGGREGATING AND KNOWLEDGE REPRESENTATION [8L]

Ontology and their role in the Semantic Web: Ontology-based knowledge Representation - Ontology languages for the Semantic Web: Resource Description Framework - Web Ontology Language - Modelling and aggregating social network data: State-of-the-art in network data representation - Ontological representation of social individuals - Ontological representation of social relationships - Aggregating and reasoning with social network data - Advanced representations.

UNIT III EXTRACTION AND MINING COMMUNITIES IN WEB SOCIAL NETWORKS [7L]

Extracting evolution of Web Community from a Series of Web Archive - Detecting communities in social networks - Definition of community - Evaluating communities - Methods for community detection and mining - Applications of community mining algorithms - Tools for detecting communities social network infrastructures and communities - Decentralized online social networks - Multi-Relational characterization of dynamic social network communities.

UNIT IV PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES

Understanding and predicting human behaviour for social communities - User data management - Inference and Distribution - Enabling new human experiences - Reality mining - Context - Awareness - Privacy in online social

[7L]

networks - Trust in online environment - Trust models based on subjective logic - Trust network analysis - Trust transitivity analysis - Combining trust and reputation - Trust derivation based on trust comparisons - Attack spectrum and countermeasures.

UNIT V VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS

[7L]

Graph theory - Centrality - Clustering - Node-Edge Diagrams - Matrix representation - Visualizing online social networks, Visualizing social networks with matrix-based representations - Matrix and Node-Link Diagrams - Hybrid representations - Applications - Cover networks - Community welfare - Collaboration networks - Co-Citation networks.

Course title				E-Comr	nerce & ERP					
Scheme and Credits	L	T	Р	Cr. Points	Lec. Hrs.					
	3	0	0	3	36					
Pre-requisites/ Co-			-	Software	Engineering					
requisites (if any)										

- Overview: Definitions, Advantages & Disadvantages of E Commerce, Threats of E Commerce, Managerial Prospective, Rules & Regulations for Controlling E Commerce, CyberLaws. [3 L]
- 2. **Technologies :** Relationship Between E Commerce & Networking, Different Types of Networking Commerce, Internet, Intranet & Extranet, EDI Systems Wireless Application Protocol : Definition, Hand Held Devices, Mobility & Commerce, Mobile Computing, Wireless
 - Web, Web Security, Infrastructure Requirement For E Commerce. [5 L]
- 3. Business Models of e commerce: Model Based On Transaction Type,

Model Based OnTransaction Party - B2B, B2C, C2B, C2C, E – Governance. [2 L]

- 4. E strategy: Overview, Strategic Methods for developing E commerce. [2 L]
- 5. Four C's: (Convergence, Collaborative Computing, Content Management & Call Center). Convergence : Technological Advances in Convergence Types, Convergence and its implications, Convergence & Electronic Commerce. Collaborative Computing: Collaborative product development, contract as per CAD, Simultaneous Collaboration, Security. Content Management: Definition of content, Authoring Tools & Content Management, Content partnership, repositories, convergence, providers, Web Traffic & Traffic Management; ContentMarketing. Call Center: Definition, Need, Tasks Handled, Mode of Operation, Equipment, Strength & Weaknesses of Call Center, Customer Premises Equipment (CPE). [6 L]
- 6. Supply Chain Management: E logistics, Supply Chain Portal, Supply Chain Planning Tools(SCP Tools), Supply Chain Execution (SCE), SCE Framework, Internet's effect on Supply Chain Power. [3 L]
- 7. **E Payment Mechanism:** Payment through card system, E Cheque, E Cash, E PaymentThreats & Protections. [1 L]
- 8. E Marketing: Home shopping, E-Marketing, Tele-marketing [1 L]
- Electronic Data Interchange (EDI): Meaning, Benefits, Concepts, Application, EDI Model, Protocols (UN EDI FACT / GTDI, ANSI X – 12), Data Encryption (DES / RSA). [2 L]
- 10. **Risk of E Commerce:** Overview, Security for E Commerce, Security Standards, Firewall, Cryptography, Key Management, Password Systems, Digital certificates, Digital signatures. [4 L]
- 11. Enterprise Resource Planning (ERP): Features, capabilities and Overview of Commercial Software, re-engineering work processes for IT applications, Business Process Redesign, Knowledge engineering and data warehouse. Business Modules: Finance, Manufacturing (Production), Human Resources, Plant Maintenance, Materials Management, Quality Management, Sales & Distribution ERP-Package.
- 12. ERP Market: ERP Market Place, SAP AG, PeopleSoft, BAAN, JD Edwards, Oracle Corporation ERP-Present and Future: Enterprise Application Integration (EAI), ERP and E-Commerce, ERP and Internet, Future Directions in ERP [10].

Average	3	2	2	3	2	2	1	-	3	3	2	2

Subject Code	Subject Name	L	Т	P	C
PECICB702A	Machine Learning	3	0	0	3
Pre-requisite	NIL				
Course Objectives:					
1. Ability to comprehe	end the concept of supervised and unsupervised learning te	chni	iques	5	
2. Differentiate regres	sion, classification and clustering techniques and to impler	nent	t thei	r algo	orithms.
3. To analyze the perf	formance of various machine learning techniques and to sel	lect	appr	opriat	te
features for training m	achine learning algorithms.				
Expected Course Ou	tcome:				
1. Understand the theory	y of Artificial intelligence and Machine Learning.				
2. Understand the Know	ledge representation issues and concept learning.				
3. Apply decision tree lo	earning and artificial neural networks.				
4. Apply Bayesian learn	ing using bayes theorem, naive bayes classifier and EM Algorit	hm.			

5. Apply association rule mining and unsupervised learning.

Introduction to Machine Learning Module:1

3 hours

Introduction to Machine Learning (ML); Feature engineering; Learning Paradigm, Generalization of hypothesis, VC Dimension, PAC learning, Applications of ML.

Data Handling and ANN Module:2

4 hours

4 hours

Feature selection Mechanisms, Imbalanced data, Outlier detection- Artificial neural networks including backpropagation- Applications

Module:3 **ML Models and Evaluation** 6 hours Regression: Multi-variable regression; Model evaluation; Least squares regression; Regularization; LASSO; Applications of regression, Classification - KNN, Naïve Bayes, SVM, Decision Tree; Training and testing classifier models; Cross-validation; Model evaluation (precision, recall, F1mesure, accuracy, area under curve); Statistical decision theory including discriminant functions and decision surfaces

Module:4 **Model Assessment and Inference**

Model assessment and Selection - Ensemble Learning - Boosting, Bagging, Model Inference and Averaging, Bayesian Theory, EM Algorithm

Module	e:5	Hidden Markov Models	3 hours
Hidden	Marko	v Models (HMM) with forward-backward and Vierbi algorith	hms; Sequence
classific	cation us	ing HMM; Conditional random fields; Applications of sequence class	ification such as
part-of-	speech ta	agging	
Module	e:6	Association Rules	3 hours
Mining	Associat	ion Rules in Large Databases. Mining Frequent Patterns basic concep	ots - Efficient and
scalable	e frequen	t item set mining -methods, Apriori algorithm, FP-Growth algorithm	
Module	e:7	Clustering	5
			hours
K Mear	ns, Hieran	chical Clustering – Single, complete, Average linkage; Ward's algorith	m; Minimum
spannin	g tree clu	astering; BIRCH clustering	
Module	e:8	Recent Trends	2
			hours
Recent	Trends a	nd case study	
		Total Lecture hou	rs: 30
			hours

Course title		Cyber Security in Block Chain Technology						
Scheme and Credits	L	T	Р	Cr. Points	Lec. Hrs.			
	3	0	0	3	36	-		
Pre-requisites/ Co- requisites (if any)			·					

Privacy, Security issues in Blockchain

Pseudo-anonymity vs. anonymity, Zcash and Zk-SNARKS for anonymity preservation

attacks on Blockchains - such as Sybil attacks, selfish mining, 51% attacks - -advent of algorand

Sharding based consensus algorithms to prevent these attacks

Cryptography

Public Key Infrastructure (PKI) and Cryptography

Conventional PKI, Blockchain as a Form of Distributed PKI, Blockchain vs PKI

Blockchain - Public Key Cryptography, Decentralized Public Key Infrastructure (DPKI)

Digital Signature

Digital Signature from Blockchain context

Undeniable signature

Diffie-Hellman, Digital signature scheme for information non-repudiation in blockchain

Blockchain-based time stamping

Time stamping Metadata Using Blockchain

Decentralized Trusted Time stamping Based on Blockchain

Content Time stamping

Use Cases of Blockchain In Cyber security

Decentralized Storage Solutions, How Guard time uses blockchain technology to safeguard data IoT Security, Safer DNS, Using blockchains to prevent DDoS attacks Implementing Security in Private Messaging

Reference Books:

- 1. Blockchain Technology Basics: Blockchain cryptography and cybersecurity Kindle Edition by Raghava Shankar (Author), Srikanth RC Cherukupalli M.Tech (Author)
- 2. Mastering Blockchain: Deeper insights into decentralization, cryptography, Bitcoin, and popular Blockchain frameworks Kindle Edition by Imran Bashir (Author) Format: Kindle Edition.

CO1: Understanding Blockchain Security.

CO2: Implementing Secure Blockchain Architectures.

- CO3: Understand and explain Cryptographic Techniques for Blockchain Security.
- CO4: Apply time-stamping for Blockchain.

CO5: Apply different use-cases of Blockchain in cybersecurity.

- CO 1 Soft Skills At the end of the course, the students will have the ability to communicate convincingly and negotiate diplomatically while working in a team to arrive at a win-win situation. They would further develop their inter-personal and leadership skills.
- CO 2 Soft Skills At the end of the course, the students shall learn to examine the context of a Group Discussion topic and develop new perspectives and ideas through brainstorming and arrive at a consensus.
- CO 3 Aptitude At the end of the course, students will be able to identify, recall and arrive at appropriate strategies to solve questions on geometry. They will be able to investigate, interpret and select suitable methods to solve questions on arithmetic, probability and combinatorics.
- CO 4 Verbal At the end of the course, the students will have the ability to relate, choose, conclude and determine the usage of right vocabulary.
- CO 5 Verbal At the end of the course, the students will have the ability to utilize prior knowledge of grammar to recognize structural instabilities and modify them.

Aim:		·						
Sl. No.								
1.	1. To give students an introduction to the basic practical techniques of bioinformatics. Emphasis will be given to the application of bioinformatics and biological databases to problem solving in real research problems.							
2.	2. The students will become familiar with the use of a wide variety of internet applications, biological database and will be able to apply these methods to research problems.							
Course Outcom	le:							
Sl. No.	After completion of the co	ourse, students will be able to:						
C01.	Knowledge and awareness and mathematics.	of the basic principles and concepts of biolog	y, compute	er science				
CO2.	Describe the contents and p perform text- and sequence molecular biological knowl	roperties of the most important bioinformatic -based searches, and analyze and discuss the r edge	s database esults in l	s, ight of				
CO3.	Explain the major steps in p for, and execute pairwise se	pairwise and multiple sequence alignment, expequence alignment by dynamic programming	plain the p	rinciple				
CO4.	Predict the secondary and tertiary structures of protein sequences.							
CO5.	Understanding and Applyin over biological data analysi	g the concept of machine learning & probabil s.	listic mode	elling

Pre-requisites/ Co-							
requisites (if any)							

Data-Analytic Thinking for Business:

The Ubiquity of Data Opportunities, Data Science as a strategic asset, data analytic thinking, Business Enterprise and its functions, Enterprise Applications - ERP, CRM, MIS.

Difference between Business Intelligence and Business Analytics,

Database systems for Business: OLTP and OLAP systems for business overview and architecture overview.

Business Problems and Data Science Solutions using CRISP-DM Approach: [9L]

Business Understanding, preparation, modeling, evaluation, deployment. Performance Metrics in Analytics - Key performance, Indicators (KPIs), KPI based balanced score card, KPIs on Dashboards.

Project Management:

Project Management, phases, tools, techniques and methodologies in project management, Agile Framework and Scrum Approach. Quality Management - quality management philosophy, concepts and tools, Statistical Quality Control methods, Lean and Six Sigma, SERVQUAL model of service quality.

Case studies:

Human Capital Analytics, IT Analytics, Sales and Marketing Analytics, Analytics in telecom, Retail, healthcare, financial markets, social media, sports and other related business fields.

Reference/Text Books:

- 1. Prasad, R, N. and Acharya, Seema Fundamentals of Business Analytics. Wiley India Pvt, Ltd, New Delhi, 2016.
- 2. Provost and Fawcett , Data Science for Business, O'Reilly, 2013.
- 3. Shmueli, Patel, and Bruce, Data Mining for Business Intelligence, Concepts, Techniques and Applications. Wiley, 2009.
- 4. Clifford F. Gray, Erik W. Larson, Gautam V. Desai Project Management Tata McGraw Hill, 2014.
- 5. Schwaber Ken Agile project management with scrum, WP Publishers and Distributors, Bangalore, 2004.
- 6. Sridhar Bhatta, Total Quality Management, concepts and cases-Himalaya Publishing House, 2015.

[9L]

[9L]

[9L]

Course Outcomes:

- **CO1.** Explain the background of business analytics.
- **CO2.** Demonstrate programming methods to locate, warehouse and wrangle data.
- CO3. Utilize decision analysis as a means to build solutions for business queries.
- CO4. Relate ethical principles to the collection, storage and use of data by business and government.

Pre-requisites/ Co- requisites (if any)		-	Fun Elen	damentals of nentary Mat	f Management, hematics				

Course Objective:

The objectives of the course are:

- 1) To impart among students, the concept of project, its characteristics, and its management subject to given constraints to successfully deliver the agreed outcomes of the project.
- 2) To imbibe students with the knowledge of effective project planning, project evaluating, and project scheduling with optimal resource allocation.
- 3) To impart among students, the legal aspect and quality aspect of project management.
- 4) To familiarize the students with the concept of entrepreneurship, its theoretical and practical approach.

Course Content:

MODULE-I [10 Lectures]

Project Management Concepts: Concept and Characteristics of a Project, Types of Projects, Project Management (Need, Knowledge Areas, Project Manager, Project Management Triangle, Project Scope and Scope Creep, Importance of Project Management).

Project Management Life Cycle: Project Management Life Cycle Phases, Project Management Process (Project Process, Process Group, Process Interactions, Customization, Process Group and Knowledge Area Matrix)

Project Planning: Planning Need, Importance of Planning, Planning Process, Work Breakdown Structure and Organization Breakdown Structure, Roles, Responsibility and Team Work, Feasibility Studies.

Project Cost Control: Direct and Indirect Cost, Normal Cost and Crash Cost, Time- Cost Trade-off Analysis - Optimum Project Duration, Resource Allocation and Leveling.

MODULE – II [10 Lectures]

Project Evaluation: Investment Analysis of Projects (Time Value of Money, Interest Rates, Compounding/Discounting, Payback Period, Average Rate of Return, Net Present Value, Profitability Index, Internal Rate of Return), Sources of Finance.

Project Scheduling: Importance of Project Scheduling, Scheduling Techniques (Gantt Chart and Line of Balance, Network Analysis – CPM/PERT, Slack and Float)

MODULE-III [4 Lectures]

Legal and Quality Aspects of Project Management: Project Contract (Types of Contract, Sub-Contracting, Tenders, Payment to Contractors), Project Audit.

IT in Projects: Overview of types of Software for Projects, Major Features of Project Management Software like MS Project, Criterion for Software Selection.

MODULE-IV [6 Lectures]

Entrepreneurship: Meaning & Concept of Entrepreneurship, Conditions needed for Entrepreneurship (Social Factors, Economic Factors, Psychological Factors, Legal Factors, Education & Technical Knowhow, Financial Assistance), Qualities of a Prospective Entrepreneur.

Entrepreneurial Motivation: McClelland's N-Ach Theory (Need for Affiliation, Need for Power, Need for Achievement), Self–Analysis, Personal Efficacy, Culture & Values, Risk- taking Behaviour, Technology Backup.

Entrepreneurial Skills: Creativity, Problem Solving, Decision Making, Communication, Leadership Quality.

Textbooks:

8. S. A. Kelkar; Software Project Management: A concise Study; Prentice Hall India; 2nd Edn.

- 9. F. K. Levy, J. D. Wiest; A Management Guide to PERT/CPM with GERT/PDM/DCPM and other networks; Prentice Hall India, 2nd Edn.
- 10. J. Mantel, J. R. Meredith, S. M. Shafer, M. M. Sutton, M. R. Gopalan; Project Management: Core Text Book, Wiley India, 1st Indian Edn. L. C. Jhamb; Industrial Management-II; Everest Publishing House; 10th Edn.
- 11. S. N. Chary; Production and Operation Management; Tata McGraw Hill
- 12. Clements, Gido; Effective Project Management; Thomson Learning
- 13. C. F. Gray, E. W. Larson; Project Management; Tata McGraw Hill; 3rd Edn.
- 14. S.C. Sharma & T.R.Banga, Industrial Engineering & Management, Khanna Book Publishing Co. (P) Ltd.

Course Outcome (CO):

After successful completion of this course, the student will be able to:

- **CO1.** Learn general concept of a project and project management, the importance of project life cycle and essential elements of project planning.
- **CO2.** Analysis of project evaluation, project scheduling as well as project cost control through application of financial and mathematical tools.
- **CO3.** Learn details of legal and quality aspects of project management to face various issues.
- **CO4.** Study and demonstrate the features of different project management softwares with special emphasis on "MS Project" and can able to select the best PMS subject to desired requirements.
- **CO5.** Develop skills of entrepreneurship both theoretical and practical approach and can take initiative of starting a new business.
- **CO6.** Align the successful approach of entrepreneurship in undertaking large investment projects for the necessity and benefit of the society.

Project-II Code: PROJICB 781 Contact: 12P Credit-6

Course Objective:

The purpose of final year projects for computer science is to allow students to apply the knowledge and skills they have acquired during their studies to a real-world problem.

Course Outcomes: After completion of this course the students will be able to

- **CO1.** Ability to identify the unsolved problem in the selected domain indicates the literature survey done.
- CO2. Ability to analyze the nature of the problem with respect to its class reducibility.
- **CO3.** Ability to find the best possible solution with respect to time and space complexity & other parameters.
- CO4. The consistency of meeting the mentor and its other team members with interactive discussions.
- **CO5.** The verbal and technical skills in presenting the ppt. along with active responses to the queries generated.

Project Work II & Dissertation:

The object of Project Work II & Dissertation is to enable the student to extend further the investigative study taken up under EC P1, either fully theoretical/practical or involving both theoretical and practical work, under the guidance of a Supervisor from the Department alone or jointly with a Supervisor drawn from R&D laboratory/Industry. This is expected to provide a good training for the student(s) in R&D work and technical leadership. The assignment to normally include:

- 1. In depth study of the topic assigned in the light of the Report prepared under EC P1;
- 2. Review and finalization of the Approach to the Problem relating to the assigned topic;
- 3. Preparing an Action Plan for conducting the investigation, including team work;
- 4. Detailed Analysis/Modelling/Simulation/Design/Problem Solving/Experiment as needed;
- 5. Final development of product/process, testing, results, conclusions and future directions;
- 6. Preparing a paper for Conference presentation/Publication in Journals, if possible;

7. Preparing a Dissertation in the standard format for being evaluated by the Department. 8. Final Seminar Presentation before a Departmental Committee.
